

InVigor[®] Dodger

You'll be glad you planted it.

Hybrid spring oilseed rape that reaches new levels of output

- Very high yields with bonus of high oil content
- Proven to be a consistent performer on farm and in trials

Variety description

Dodger is a spring oilseed rape hybrid

Yield components

| | | |
|-----------------------|----------|-----------|
| Gross output | 102% | Very high |
| Seed yield | 101% | Very high |
| Oil % | 45.2% | Very high |
| Glucosinolate content | 15.2µmol | Medium |

Agronomy

| | |
|----------------------|-------------------------|
| Regional suitability | National |
| Soil types | No differences known |
| Sowing date | Mid March – mid April |
| Sowing method | No differences known |
| Harvest method | Desiccation or swathing |

Variety characteristics

| | | | |
|------------------------|------|-------|-------|
| Early vigour | low | ●●●●● | high |
| Earliness of flowering | late | ●●●●● | early |
| Earliness of maturity | late | ●●●●● | early |
| Plant height | tall | ●●●●● | short |
| Lodging resistance | low | ●●●●● | high |

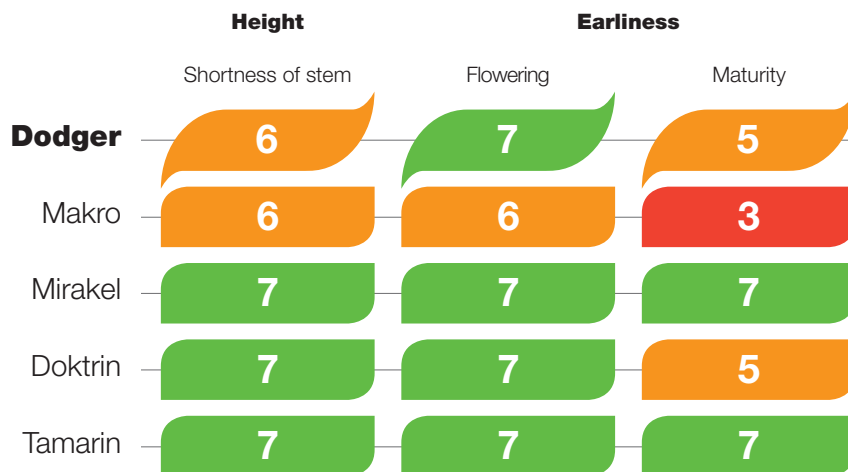

Ease of management

Dodger is medium tall but is vigorous and flowers early to deliver a manageable maturity date.

Dodger combines a higher biomass characteristic than the earliest types which helps yield production; it flowers early and benefits from medium maturity allowing the full development of its high oil content before a reasonably timed harvest. First listed in 2014, Dodger has shown consistent performance in official trials and on-farm.

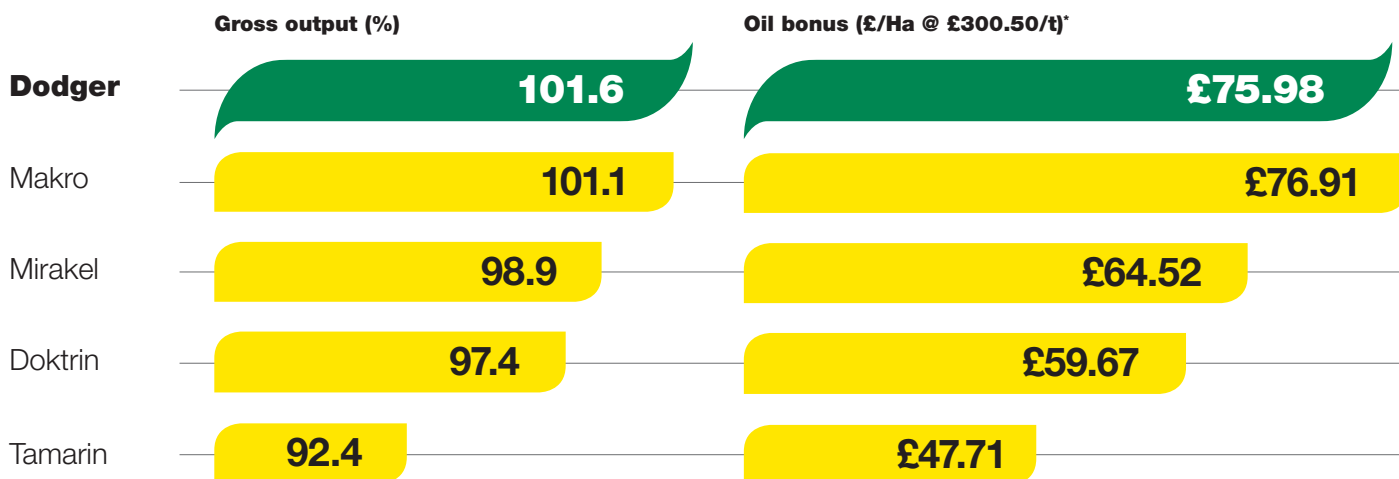

■ Low: 1–4 ■ Medium: 5–6 ■ High 7–9

Higher scores reflect that the variety shows the characteristic to a higher degree. Data extracted from AHDB DL 2018/19.

Performance and income

Dodger delivers very high returns through a combination of high yield plus oil bonus.

Data extracted from AHDB DL 2018/19. * Based on DL gross output and a grain price of £300.50/t.

Treatment

Dodger seed is supplied in 2.1m viable seed packs, treated with:

Thiram
