

Tank-mix sheet

Revised September 2015

Please note that physical compatibilities may not be approved tank-mixes. The tests do not check for any adverse crop phytotoxicity or for the biological efficacy of the individual components when applied in a tank-mix. Bayer CropScience gives no warranty and accepts no liability in respect of physical compatibilities; therefore, use is at grower's own risk.

All the requirements or restrictions on other product labels must be adhered to when tank-mixing with Regatta®. Contact Bayer CropScience for full details.

Regatta can be tank-mixed with any herbicide in the first table as well as with an insecticide from the second table. A maximum of only 2 selections, one from each table, can be tank-mixed with Regatta at any one time.

Herbicides		
Atlantis® WG + biopower®	DFF (up to a total of 120 g DFF /ha) +/- flupyr-sulfuron-methyl. Winter wheat only, pre-em only.	Pacifica® + biopower® (After Feb 1 st and max. application rate of 0.4 Kg/ha, no insecticide to be added)
